#### **About Auramex**

Auramex is exploring a large and highly prospective property portfolio at the south end of the Golden Triangle in British Columbia, with properties north, east and south of Stewart, a deep-water port.

The Golden Triangle is beginning to be recognized as one of the most highly mineralized geological settings with excellent exploration potential for future discoveries.

The Golden Triangle region has matured dramatically over the past couple of years, with two mines now in production, road access greatly improved, and a quantum leap in terms of geological understanding of the processes that created some of the largest, and highest-grade metal deposits on the planet.
