**AURAMEX RESOURCE CORP. ACQUIRES NEW GROUND ALONG RADARSAT  
TREND IN THE STEWART CAMP**

Auramex Resource Corp. is pleased to report the acquisition of two parcels of ground in the prospective stratigraphy of the Bear Pass area of the historic Stewart camp. The first of these acquisitions comprises the Yvonne East and Yvonne West tenures, staked to secure the 234.41 ha area of Yvonne Peak on the northern boundary of its Lucky Frenchman property. This entire western area of Lucky Frenchman is characterised by a significant positive magnetic anomaly detected during a 2009 airborne survey.

Auramex also extended its Tory property by the acquisition of the 360.85 ha Heather tenure. The ground thus acquired is, to our knowledge, the first in the area to be acquired as a result of preliminary examination of processed synthetic aperture radar data from Canada's RadarSat constellation. Processing of these images was carried out by Auracle Geospatial Science Inc. of Qualicum, B.C., making this an "all-Canadian" operation. The preliminary RadarSat data is in agreement with magnetic data acquired in 2009.

The expanded Tory property lies on structural strike from the BA mineral occurrence of Great Bear Resources along northwest-trending radar and aeromagnetic discontinuities. Auramex looks forward to ground-truthing this discontinuity as part of the summer's exploration.

**About Auramex Resource Corp. – [www.auramex.com](http://www.auramex.com)**

Auramex Resource Corp. is a junior mining exploration company with projects in British Columbia and in Sinaloa State, Mexico. In B.C., the Company holds approximately 20,000 hectares near Stewart, in the Golden Triangle.

For information on Auramex please contact Judie Whitby at (604) 924-9376 or refer to the company's website: [www.auramex.com](http://www.auramex.com).
