About Auramex Resource Corp.

AUX is exploring the past-producing Georgia River high-grade gold mine located 16 kilometres south of Stewart, BC in the prolific Golden Triangle. Georgia River was explored from the 1970s by several companies with the intent of restarting the mine, but this historic work only focused on the area hosting the existing mine workings. Work by AUX over the past few field seasons has generated compelling evidence in support of a large intrusion-related gold target adjacent to the area of previous work. Field crews have mobilized, and contractors are being selected to facilitate the 2020 field program which will involve drill testing the newly defined high-grade gold target.
